## Book Systems, Inc. announces the Release of Concourse 8.1

Concourse 8.1 includes new and exciting options for customers, such as support for Microsoft® Windows Vista™. One of the new product features is the library can provide an easy- to-use self check-out station for your patrons by creating a SELFCIRC worker and realigning the worker's Circulation Desk permissions. This new feature is great for patrons who need to quickly check out items when the library is busy, and it is also a good solution for school libraries where an entire class checks out at the same time each week. Settings are in place to restrict patrons from accessing sensitive records. Another new feature enables the librarians to customize circulation information at the Circulation Desk and print the circulation grid to your local printer. All of the new enhancements are documented in the User's Guide and in the online Helps from the top menu bar in Concourse. Book Systems is dedicated to putting the customer first. As a result, some of the features in this new version are based on customer feedback we have received.

### About Book Systems, Inc.:

Book Systems Inc. provides affordable feature-rich library software that delivers solutions to libraries of all sizes. Our software is suited to fit the needs of librarians in a technology driven world, while still being easy to learn and user-friendly. Atrium offers an easy-to-use circulation desk, quick cataloging, MARC editing, analysis, easy-to-create reports, theme choices, serials, acquisitions and textbook management. Our software provides more features and demand fewer resources. Book Systems is dedicated to quality and customer satisfaction, and has implemented library automation solutions in thousands of libraries around the world. The company's philosophy is very simple: create quality products; test them with input and direction from librarians in the field; and back them up with renowned customer service and support. Book Systems is a privately-owned company with its corporate headquarters located in Huntsville, Alabama, where NASA's space programs and other government technologies have created a vibrant environment of innovation. Further information is available at [www.booksys.com](http://www.booksys.com).
